## ANNUAL E-GOVERNANCE REPORT 2019-20

E-governance in educational sector enables the processing and documentation of information facilitates quick and convenient communication between related parties, promotes transparency, accountability, improves customer service and helps to access information easily. These basic traits when provided by software lay the foundation of e-governance.

Implementation of E-Governance at MITE began in the academic year of 2011-12. The Enterprise Resource Planning (ERP) product was provided by **Colors Cards Solutions Pvt. Ltd., Hyderabad**. Thereafter, after completion of the contract tenure MITE procured and implemented ERP software provided by **TCS iON** in the academic year 2014. From the perspective of enhanced user interface, in the academic year of 2018 ERP software named 'Dhi' powered by **Heraizen Technologies Pvt Ltd, Bangalore** was implemented and is used till date.

MITE is continuing and effectively using the ERP software in the following operational domains of the Institute:

### **1. Administration**

It involves the use of ICT and e-Governance in order to improve administration processes and the internal working of the departments within an educational organization. The implementation of e-governance in area of operation of administration has following aspects.

- The college authorities can have full supervision of service units in the office through the ERP software (Product name: Dhi)
- Biometric attendance for all staff members of the institution.
- Leave management through online.

## **2. Finance and Accounts**

The accounts of the institution are maintained through the Tally and ERP software (Dhi). The following features are provided in ERP software

- Master fee template: Generate Fee templates: Collect Admission fee: Collect Term fee etc.

## **3. Student Admission and support**

The ERP software is successfully implemented to fulfil the need of Student admission and Support. As the admission process is implemented online, admission forms are also provided. Students submit admission form and required documents at respective counters and same will be updated in the software. The Bulk SMS service was provided for sending information to parents regarding student attendance, performance, parent-teacher meetings etc. This helped in keeping the parents informed about the performance of the student. Also the students can submit their Grievances through online using ERP software. Also, the student feedback collection module has been activated in ERP software.

## **4. Examination**

The implementation of e-governance in area of operation of Examination will lead to effective monitoring of Examination Process by the concerned authorities/faculty members. A high degree of efficiency could be added to the existing structure by automating the examination activities, there will be centralised, secure and robust database can be maintained through ERP software.

The cost towards the implementation of e-governance in the area of operation has been internally audited and same was audited in accordance with Standards on Auditing issued by the Institute of Chartered Accountants of India.

### **Criteria 6.2.3: Implementation of e-governance in areas of operation**

## **3. Policy document on e-governance.**

## E-Governance Policy

### **Preamble:**

Mangalore Institute of Technology and Engineering (MITE) established with a vision to impart quality education, adhering to the needs of sharp young minds empowering them with in-depth knowledge and skills, creating future innovators and leaders. For overall growth and development, to sustain quality and establish itself as one of the Institutes of Excellence in the country in Technical Education it is necessary to have collaboration and access to information available in Institution through information technology with E-Governance as a security for maintaining transparency. As per the **short-term plans developed for the period of 2012-16**, Management of MITE has decided to implement e-governance policy in the institution.

E-Governance policy highlights the importance of Smart Governance for improving the internal organizational processes. The policy helps in achieving efficacy in various operations of the institution in an integrated manner ensuring clarity in different functionalities like **E- administration, E- services** related to Finance, Accounts, Student Admission and Support, Examination, Library and for the direct involvement of stakeholders in administrative and decision-making process.

### **Objectives of implementing E-Governance Policy:**

1. To enhance good governance in the Institution by attaining efficiency in the organizational processes through effective participation, transparency and accountability.
2. To promote paperless administration.
3. To provide easy access to information facilitating electronic mode of communication amongst all departments and stakeholders of the institution.

### **Policy Statement:**

MITE shall adopt E-governance to enhance good governance by enabling quick and transparent Integration of internal organizational processes, promoting participation of all stakeholders, for the continuous advancement and global recognition of the institution.

## Areas of Implementation of E – Governance:

### 1. Administration

To provide hassle-free environment for the overall administration of the institution, various organizational processes should be integrated with ICT based technology – a user friendly **Enterprise Resource Planning (ERP) solution** to automate various modules of institutional functioning like

- **Biometric Attendance System:** The centralized attendance monitoring system for all the staff of the Institution which is required to ensure error free, easy access and better management of staff attendance.
- **Leave Management System:** Facilities should be provided in the ERP system for online leave management of employees.
- **Student Admission and Support:** The Institution has to process the student admissions using the ERP software. The data should be well organized and stored in centralized database for further use and should be made available to other required modules of ERP system for monitoring students academic performance.

### 2. Examination:

- **Internal Assessment Evaluation:** There should be well-designed Internal Assessment evaluation modules in the ERP system. Course-wise lesson plan, time table, question papers, scheme of valuation, internal assessment marks, attendance entry etc., should be made available in the ERP system. Provision should be made for students and parents to verify the IA marks, attendance and academic progress through ERP system.
- **SMS system for sending IA marks & attendance:** SMS system has to be implemented effectively to provide information to the parents on academic performance of their wards.

### 3. Finance and Accounts:

Suitable financial software tool/ERP system should be used to handle institution's financial transactions and to maintain accounting information with utmost care. Appropriate security measures should be taken for maintaining confidentiality of the transactions.

*The necessary training to all the staff to be provided for the effective usage of ERP system.*

**4. Electronic mode of Communication:**

Email and SMS are the common communication methods for sharing information with all stake holders. To transmit documents and other information, the institution must extend email facility to all the departments and staff thereby encouraging reduced paper usage and promoting carbon free campus.

**5. Website:**

Website is one of the technological tools through which the Institution shares its academic profiles with the rest of the world. The website acts as a mirror of the college activities reflecting the information about admission criteria, courses, facilities, departments, faculty information, research activities, placements, alumni information, important notices, etc. For this purpose, a separate service provider/web designer may be appointed by the Institution or can be developed in-house. Qualified personnel should be identified at the college level for website administration.

**6. Library:**

Library is the integral part of the learning process to promote effective teaching-learning. All the Library functions should be automated with standard library management software. Bar coding system to be installed for easy and fast access to library resources. Provisions should be made in the library for having access to Digital Library through the software. Library should be equipped with high speed Internet facilities for the access of e-Resources. There should be an anti-plagiarism tool in place intended for use by the faculty & students.

**7. University Examination:**

The institution to be equipped with adequate IT infrastructure to carry out University examination related work with utmost confidentiality as per the instructions of the University.

**8. Alumni Portal :**

In order to strengthen alumni network, a separate alumni portal should be started providing facilities like registration, information of college activities, prominent alumni, milestones achieved by alumni and their feedback. For this purpose a separate alumni coordinator at the college level be appointed to take care of the entire activity.

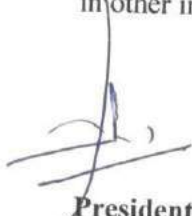

# RAJALAXMI EDUCATION TRUST (Regd.)

## Implementation of the Policy

Head of the Institution is authorised to implement the policy in the above stated areas in consultation with the management as per the requirement.

## Review of the Policy

The management of the institution reserves the right to implement e-governance even in other indispensable areas and amend the policy issues as and when required.

President

Rajalaxmi Education Trust®

Date: 15/10/2012
