9	Action Taken Report	99-105

Student Feedback on Curriculum

1. Has the Courses been designed such that the prerequisite courses have been covered?
 - Yes
 - Yes in the most of the courses
 - No in the most of the courses
 - No
2. How do you rate the syllabus of the courses that you have studied with respect to the Course Outcomes?
 - Excellent
 - Very Good
 - Good
 - Average
 - Poor
3. How do you rate the sequence of units in the Syllabus relevant to the Course?
 - Excellent
 - Very Good
 - Good
 - Average
 - Poor
4. How do you rate the allocation of credit for the courses?
 - Excellent
 - Very Good
 - Good
 - Average
 - Poor
5. The electives offered is in relevance with the technological advancements
 - Strongly Agree
 - Agree
 - May be
 - Disagree
6. Rate the size of syllabus in terms of load to the students
 - Can be completed with ease
 - Manageable

7. How do you rate the percentage of courses having lab Components
 - Excellent
 - Adequate
 - Inadequate
8. The laboratory experiments complement the learning of the Subjective Courses
 - Strongly Agree
 - Agree
 - Disagree
9. How do you rate the experiments in relation with real life applications?
 - Excellent
 - Very Good
 - Good
 - Average
 - Poor
10. Comments on curriculum or any course or the syllabus, if any:

Teacher Feedback on Curriculum

1. Syllabus is suitable for the program
 - Strongly Agree
 - Agree
 - Disagree
 - Strongly Disagree
2. Aims and objectives of the syllabus are well defined and clear to teachers and students
 - Strongly Agree
 - Agree
 - Disagree
 - Strongly Disagree
3. The syllabus has made teachers to increase the knowledge in subject area
 - Strongly Agree
 - Agree
 - Disagree
 - Strongly Disagree
4. The syllabus has good balance between theory and application
 - Excellent
 - Very Good
 - Good
 - Poor
5. The books prescribed as reference materials are relevant updated and appropriate
 - Excellent
 - Very Good
 - Good
 - Poor
6. The University is Teacher friendly & considers feedback on syllabus from the stakeholders
 - Strongly Disagree
 - Disagree
 - Agree
 - Strongly agree

7. Semester Examinations are Conducted well in Time and with non discriminatory
 - Strongly Agree
 - Agree
 - Disagree
8. Teachers have the freedom to adopt new techniques/strategies of teaching such as seminar presentations, group discussions and learners participations
 - Strongly Agree
 - Agree
 - Disagree
9. The University/Institute provide adequate support to faculty members for upgrading their skills and knowledge for effective curriculum delivery
 - Excellent
 - Very Good
 - Good
 - Poor
10. Syllabus for the program sufficiently equip the students with the industry requirements for the job
 - Strongly Agree
 - Agree
 - Disagree
11. Any Other Comments:

Structured Feedback from Employer

Name of the Employer		Date:	
Organization:			

1. Technical skills appropriate to job requirements

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

2. **Accountability:** Punctual in attending work and honor commitment to meet deadlines

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

3. Competency level

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

4. Adequacy of skill

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

5. **Quality of work:** Compete tasks accurately. Work reflects neatness, attention to detail, and compliance to company standards

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

6. Adequacy of Curriculum

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

7. Target Orientation

4-Excellent 3 - Very Good 2- Good 1-Fair 0-Poor

8. **Initiative:** Consistently demonstrates a proactive nature. Takes appropriate action without constant supervision

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

9. Ability to relate theory to practice

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

10. **Analysis and Judgment:** Demonstrates the ability to analyze the facts and make sound decisions

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

11. **Communication and Attitude:** Expresses verbal and written ideas effectively. Interacts well with others and resolves conflicts

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

12. Overall rating

4-Excellent 3- Very Good 2- Good 1-Fair 0-Poor

Alumni Feedback on Curriculum

1. Which type of profession you are following/ followed after graduation?
 - Job
 - Self Employed
 - Research
 - Higher Studies
2. Do you feel that there is any gap in curriculum you have learnt and what is expected in your profession from freshers?
 - Yes
 - No
3. What I learnt in graduation program prepared me for my professional or academic or entrepreneur career
 - Strongly Agree
 - Agree
 - Disagree
 - Neutral
 - Strongly Disagree
4. Have you obtained sufficient technical know-how (both in theory and practice) at MITE?
 - Yes
 - No
5. Curriculum is sufficiently good enough to pursue higher studies?
 - Strongly Agree
 - Agree
 - Disagree
 - Strongly Disagree
6. Special Trainings like workshop, internship for bridging Industry Academic gap is essential
 - Yes
 - No
 - Maybe
7. Any other suggestions/comments:

Summary Report of Students Feedback on Curriculum for the Academic Year 2018-19

1. The courses been designed such that the prerequisite courses have been covered previously.

59 responses

2. How do you rate the syllabus of the courses that you have studied with respect to the Course Outcomes?

59 responses

3. How do you rate the sequence of units in the syllabus relevant to the course?

59 responses

4. How do you rate the allocation of Credit for the courses?

59 responses

5. The electives offered is in relevance with the technological advancements

59 responses

6. Rate the size of syllabus in terms of load to the students

59 responses

7. How do you rate the percentage of courses having lab components ?

59 responses

8. The laboratory experiments complement the learning of the Subjective Courses

59 responses

9. How do you rate the experiments in relation with real life applications?

59 responses

10. Comments on curriculum or any course or the syllabus, if any

0 responses

Summary Report of Student Feedback on Curriculum for the Academic Year 2018-19

1. The courses been designed such that the prerequisite courses have been covered previously.

53 responses

2. How do you rate the syllabus of the courses that you have studied with respect to the Course Outcomes?

53 responses

3. How do you rate the sequence of units in the syllabus relevant to the course?

53 responses

4. How do you rate the allocation of Credit for the courses?

53 responses

5. The electives offered is in relevance with the technological advancements

53 responses

6. Rate the size of syllabus in terms of load to the students

53 responses

7. How do you rate the percentage of courses having lab components ?

53 responses

8. The laboratory experiments complement the learning of the Subjective Courses
53 responses

9. How do you rate the experiments in relation with real life applications?
53 responses

10. Comments on curriculum or any course or the syllabus, if any

53 responses

NIL

Should have included more of industrial knowledge

Syllabus could be updated to the present day industrial use

Summary Report of Teacher Feedback on Curriculum for the Academic Year 2018-19

1. Syllabus is suitable for the program

3 responses

2. Aims and objectives of the syllabus are well defined and clear to teachers and students

3 responses

3. The syllabus has made teachers to increase the Knowledge in subject area

3 responses

4. The Syllabus has good balance between theory and application

3 responses

5. The books prescribed as reference materials are relevant, updated and appropriate

3 responses

6. The University is Teacher friendly and considers the feedback on syllabus from the stakeholders
3 responses

7. Semester Examinations are Conducted well in Time and with no discrimination

3 responses

8. Teachers have the freedom to adopt new techniques/strategies of teaching such as seminar presentations, group discussions and learners participation.

3 responses

9. The University/Institute provide adequate support to faculty members for upgrading their skills and knowledge for effective curriculum delivery .

3 responses

10. Syllabus for the program sufficiently equip the students with the industry requirements for job.
3 responses

11. Any other Comments on enhancement of syllabus for the benefit of students

Summary Report of Alumni Feedback on Curriculum for the Academic Year 2018-19

1. Which type of profession you are following/ followed after graduation?

45 responses

2. Do you feel that there is any gap in curriculum you have learnt and what is expected in your profession from freshers?

45 responses

3. What I learnt in graduation program prepared me for my professional or academic or entrepreneur career

45 responses

4. Have you obtained sufficient technical know-how (both in theory and practice) in your curriculum ?

45 responses

5. Curriculum is sufficiently good enough to pursue higher studies .

45 responses

6.Special Training like workshop, Internship for bridging Industry Academic gap is essential.

45 responses

7.Any other suggestions/comments:

3 responses

The real world application of the curriculum is zero if you're planning to work in a manufacturing industry.

No comments, things looks good

Focus more on Practical knowledge

Summary Report of Alumni Feedback on Curriculum for the Academic Year 2018-19

1. Which type of profession you are following/ followed after graduation?

54 responses

2. Do you feel that there is any gap in curriculum you have learnt and what is expected in your profession from freshers?

54 responses

3. What I learnt in graduation program prepared me for my professional or academic or entrepreneur career

54 responses

4. Have you obtained sufficient technical know-how (both in theory and practice) in your curriculum ?

54 responses

5. Curriculum is sufficiently good enough to pursue higher studies .

54 responses

6.Special Training like workshop, Internship for bridging Industry Academic gap is essential.

54 responses

7.Any other suggestions/comments:

54 responses

NIL

2018

A little more of depth knowledge is required

Should improve in the training of entrepreneurship

8. Teachers have the freedom to adopt new techniques/strategies of teaching such as seminar presentations, group discussions and learners participation.

3 responses

9. The University/Institute provide adequate support to faculty members for upgrading their skills and knowledge for effective curriculum delivery .

3 responses

10. Syllabus for the program sufficiently equip the students with the industry requirements for job.

3 responses

Department of Mechatronics Engineering

Any other Comments on enhancement of syllabus for the benefit of students

3 responses

no comments

Students should get more exposure to the industry.

Courses to be updated as per the requirements job roles and specialization

Action Taken Report

MANGALORE INSTITUTE OF TECHNOLOGY & ENGINEERING

An ISO 9001: 2015 Certified Institution, Accredited by NAAC
(A unit of Rajalaxmi Education Trust)

Affiliated to V.T.U., Belagavi, Approved by AICTE, New Delhi.

Action Taken Report

Date: 23-07-2018

Background:

Students of the third semester of Aeronautical Engineering submitted their grievance on the syllabus for the course 'Mechanics of Materials (Course Code: 15AE34). The course has contents that are of higher order and not conducive for under graduate students at the third semester since the pre-requisite courses were not included in the earlier semesters.

Action taken:

Since MITE is an affiliated institution and the syllabus is set by the Visvesvaraya Technological University (VTU), Belagavi, the institute holds no flexibility in formulating the syllabus. Hence the institute forwarded a requisition letter to the Chairman of Board of Studies of Aeronautical Engineering, Registrar, VTU and the Vice-Chancellor, VTU addressing the issues raised by the students.

Outcome:

The Board of Studies of the Aeronautical Engineering of the affiliated University after due discussion, revised the syllabus for the course in the subsequent 2018 scheme for the Undergraduate Aeronautical Engineering.

To,

Date: 30.05.2017

The Registrar,

VTU, Belagavi-590 018.

Respected Sir,

Sub: Result of Mechanics of Materials (15AE34) – Reg.

With reference to the about subject, we wish to bring to your kind consideration the following information.

The third semester CBCS scheme students of Aeronautical Engineering are having a subject titled Mechanics of Materials (MOM), subject code 15AE34. This subject was there in the 2010 scheme also.

In the CBCS scheme, the syllabus of very high order (PG level Syllabus) was set by VTU to the course 15AE34 which was very difficult for the students of 3rd SEM level. Considering this aspect, we have written to the Registrar VTU in our letter dated 18-7-2016, requesting for reconsideration of the syllabus.

The same has been brought to the notice of Chairman - BOS of AE board in the e-mail, dated 16-9-2016 and also conveyed to all the higher authorities of VTU. In spite of all our requests the syllabus of MOM (15AE34) remained same as it was given.

The examination was held for the subject on Nov/Dec 2016 and the results are declared. It is also observed that, the result of this subject is found to be very low in the other affiliated colleges of VTU. As expected, the results of this subject is found to be very low, i.e. 17% in our institution. The results of all other subjects of same students, under University results are found to be very good (more than 75%). Please see the enclosed letters. Because of PG level syllabus of this subject, students were unable to understand the subject.

Due to this problem, the students and parents of these failed students are under high stress. For all the good students, since they have failed a subject, it may also affect their placement opportunities in future.

We request you to kindly support the students to see that their career is supported. Else otherwise, the career of some of these students may be seriously affected.

Thanking You,

Principal

VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM
CHOICE BASED CREDIT SYSTEM (CBCS)
SCHEME OF TEACHING AND EXAMINATION 2015-2016

Mechanics of Materials [As per Choice Based Credit System (CBCS) scheme] SEMESTER – III			
Subject Code	15AE34	IA Marks	20
Number of Lecture Hours/Week	04	Exam Hours	03
Total Number of Lecture Hours	50	Exam Marks	80
CREDITS – 04			
Course objectives: This course will enable students to <ol style="list-style-type: none"> 1. Comprehend the basic concepts of strength of materials. 2. Acquire the knowledge of stress, strain under different loadings. 3. Understand the different failure theory. 			
Modules		Teaching Hours	Revised Bloom's Taxonomy (RBT) Level
Module -1 Basic equations of linear elasticity: The concept of stress, Analysis of the state of stress at a point, Equilibrium equations, The state of plane stress, The concept of strain, Analysis of the state of strain at a point, Plane strain and plane stress in polar coordinates, Problem featuring cylindrical symmetry. Constitutive behaviour of materials: Constitutive laws for isotropic materials, Allowable stress, Yielding under combined loading, Material selection for structural performance, Composite materials, Constitutive laws for anisotropic materials, Strength of a transversely isotropic lamina. Engineering structural analysis: Solution approaches, Bar under constant axial force, Pressure vessels.		10 Hours	L1, L2
Module -2 Euler-Bernoulli beam theory: The Euler-Bernoulli assumptions, Implications of the Euler-Bernoulli assumptions, Stress resultants Beams subjected to axial loads, Beams subjected to transverse loads, Beams subjected to combined axial and transverse loads. Three-dimensional beam theory: Kinematic description, Sectional constitutive law, Sectional equilibrium equations, Governing equations, Decoupling the three-dimensional problem, The principal centroidal axes of bending, The neutral axis, Evaluation of sectional stiffness.		10 Hours	L1, L2, L3
Module -3 Torsion: Torsion of circular cylinders, Torsion combined with axial		10 Hours	L1, L2, L3

VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM
CHOICE BASED CREDIT SYSTEM (CBCS)
SCHEME OF TEACHING AND EXAMINATION 2015-2016

sections, Torsion of a thin rectangular cross-section, Torsion of thin-walled open sections.		
Thin-walled beams: Basic equations for thin-walled beams, Bending of thin-walled beams, Shearing of thin-walled beams. The shear centre. Torsion of thin-walled beams, Coupled bending-torsion problems Warping of thin-walled beams under torsion. Equivalence of the shear and twist centres, Non-uniform torsion, Structural idealization.		
Module -4	10 Hours	L1, L2, L3, L4
Virtual work principles: Introduction, Equilibrium and work fundamentals, Principle of virtual work, Principle of virtual work applied to mechanical systems, Principle of virtual work applied to truss structures. Principle of complementary virtual work, internal virtual work in beams and solids. Energy methods: Conservative forces, Principle of minimum total potential energy, Strain energy in springs, Strain energy in beams, Strain energy in solids, Applications to trusses, Development of a finite element formulation for trusses, Principle of minimum complementary, Energy theorems, Reciprocity theorems, Saint-Venant's principle		
Module -5	10 Hours	L1, L2, L3
Yielding: Yielding under combined loading, Applications of yield criteria to structural, Application to bars, trusses and beams. Buckling of beams: Rigid bar with root torsion spring, buckling of beams, buckling of sandwich beams. Shearing deformations in beams, Shear deformable beams: an energy approach. Kirchhoff plate theory: Governing equations of Kirchhoff plate theory, The bending problem, Anisotropic plates, Solution techniques for rectangular plates, Circular, Energy formulation of Kirchhoff plate theory, Buckling of plates.		
Course outcomes: After studying this course, students will be able to: <ol style="list-style-type: none"> 1. Apply the basic concepts of strength of materials. 2. Compute stress, strain under different loadings. 3. Distinguish the different failure theories. 		
Graduate Attributes (as per NBA): <ul style="list-style-type: none"> • Engineering Knowledge. • Problem Analysis. • Design / development of solutions • Interpretation of data. 		
Question paper pattern:		

VISVESVARAYA TECHNOLOGICAL UNIVERSITY, BELGAUM
CHOICE BASED CREDIT SYSTEM (CBCS)
SCHEME OF TEACHING AND EXAMINATION 2015-2016

- Each full question consists of 16 marks.
- There will be 2 full questions (with a maximum of four sub questions) from each module.
- Each full question will have sub questions covering all the topics under a module.

The students will have to answer 5 full questions, selecting one full question from each module.

B. E. AERONAUTICAL ENGINEERING Choice Based Credit System (CBCS) and Outcome Based Education (OBE) SEMESTER - III			
Mechanics of Materials			
Course Code	18AS33/18AE33	CIE Marks	40
Teaching Hours/Week (L:T:P)	(3:2:0)	SEE Marks	60
Credits	04	Exam Hours	03
Course Learning Objectives: <ul style="list-style-type: none"> • Comprehend the basic concepts of strength of materials. • Acquire the knowledge of stress, strain under different loadings. • Understand the properties of materials. 			
Module-1			
Basics of linear elasticity: The concept of stress & strain, state of stress & Strain at a point, Equilibrium equations, The state of plane stress and plane strain. Compatibility equations, Constitutive Laws (Hooke's Law), Stress-strain curves for brittle and ductile materials, Allowable stress, Material selection for structural performance.			
Simple & Compound Stresses: Extension / Shortening of a bar, bars with cross sections varying in steps, bars with continuously varying cross sections. Elongation due to self-weight. Volumetric strain, expression for volumetric strain, elastic constants, simple shear stress, shear strain, temperature stresses, Introduction to Plane stress, stresses on inclined sections, principal stresses & strains, Analytical & graphical method (Mohr's Circle) to find principal stresses & strains.			
Module-2			
Bending Moment and Shear Force in Beams: Introduction, Types of beams, loads and reactions, shear forces and bending moments, rate of loading, sign conventions, relationship between shear force and bending moments. Shear force and bending moment diagrams for different beams subjected to concentrated loads, uniformly distributed load, (UDL) uniformly varying load (UVL) and couple for different types of beams.			
Euler-Bernoulli beam theory: The Euler-Bernoulli assumptions, Implications of the Euler-Bernoulli assumptions, the Euler-Bernoulli Beam theory derivation, Bending stress equation, Moment carrying capacity of a section. Shearing stresses in beams, shear stress across rectangular, circular, symmetrical I and T sections (Only Numerical).			
Module-3			
Deflection of Beams: Introduction, Differential equation for deflection. Equations for deflection, slope and bending moment. Double integration method for cantilever and simply supported beams for point load, UDL, UVL and Couple. Macaulay's method.			
Torsion of Circular Shafts and Elastic Stability of Columns: Introduction. Pure torsion, assumptions, derivation of torsional equations, polar modulus, torsional rigidity / stiffness of shafts. Power transmitted by solid and hollow circular shafts.			
Module-4			
Virtual work principles: Introduction, Equilibrium and work fundamentals, Principle of virtual work, Principle of virtual work applied to mechanical systems, Principle of virtual work applied to truss structures, Principle of virtual work applied to beams. Principle of complementary virtual work, internal virtual work in beams and solids.			
Energy methods: Conservative forces, Principle of minimum total potential energy, Strain energy in springs, Strain energy in beams, Strain energy in solids, Applications to trusses, Development of a finite element formulation for trusses, Principle of minimum complementary, Energy theorems, Reciprocity theorems, Saint-Venant's principle.			
Module-5			
Mechanical Properties of materials:			
Fracture: Type I, Type II and Type III.			
Creep: Description of the phenomenon with examples. Three stages of creep, creep properties, stress relaxation.			

Fatigue: Types of fatigue loading with examples, Mechanism of fatigue, fatigue properties, fatigue testing and S-N diagram.				
Course Outcomes: At the end of the course the student will be able to: <ul style="list-style-type: none"> • CO1: Apply the basic concepts of strength of materials. • CO2: Compute stress, strain under different loadings. • CO3: Distinguish the properties of different materials. 				
Question paper pattern: <ul style="list-style-type: none"> • The question paper will have ten full questions carrying equal marks. • Each full question will be for 20 marks. • There will be two full questions (with a maximum of four sub- questions) from each module. • Each full question will have sub- question covering all the topics under a module. • The students will have to answer five full questions, selecting one full question from each module
