Dear Mr. Thungaraju G D,
Founder
People Mechanics, Bangalore--560058

Greetings from the Department of Mechanical Engineering, MITE

The following final year BE projects have the potential to be scaled up and commercialized

1. Assessment of Al Composites Wear Behaviour
2. Development of Fuel Fraud Detector System in Automobile
3. Fabrication And Testing of Engineered Eco Friendly Construction
4. Development of Eco Composite From Waste Plastic- Feather For Plywood Replacement Applications

Project 1 is aimed to enhance the wear resistance of Al alloy using nanocomposites. The development of such composite provides longevity and increases reliability of the components fabricated from such material.

Project 2 delivers a module that prohibits tampering of fuel quantity at petrol-diesel stations

Projects 3 and 4 entails the partial or complete replacement of conventional building materials with more eco-friendly substitutes offering lower cost without loss in functionality.

We are looking forward to having industrial collaboration to further improve these student projects. We believe that the said projects can be commercialized and would benefit the society. Further, the learnings and findings obtained during the work can be extended to other potential areas of engineering.

Foresighting potential future use and benefit arising from this work we hereby invite you to provide technical feedback/input and financial assistance for the project

--

Best regards
Dr. Rajashekhar C.R
Vice Principal and Head of Mechanical Engineering Department,

Dear Sir,
Referring to your email we would like to encourage project one which is related to the development of wear and wear investigation.

Therefore we are happy to support such a potential project which is required for the current industrial applications. To encourage and motivate students we agree to sponsor 5,000 rupees.
Kindly send the bank details.

Thanking you,

Regards,
Kiran

Dear Sir,

Mr. Prathap Shetty
P.W.D Contractor
Bantwal

Greetings from the Department of Mechanical Engineering, MITE

The following final year BE project has the potential to be scaled up and commercialized

Project Title: Electricity generation through railway track

This project helps to generate a small amount of electricity which can be of use in small villages.

We are looking forward to having industrial collaboration to further improve the student project. We believe that the said project can be commercialized and would benefit the society. Further, the learning and findings obtained during the work can be extended to other potential areas of engineering.

The budgeted expense for this work amounts to about Rs. 15,000/-. The students would be grateful if your esteemed organization could fund a part of this sum.

Respected Sir

I'm grateful for the work done by the candidates, so I'm happy to fund this project "ELECTRICITY GENERATION USING RAILWAY TRACK"

So I here by request, The account details & other necessary requirements of bank, to transfer the fund.

Thanks and Regards
Prathap Shetty
